High Beams

Shining the LIGHT on HR 2048

The Motor Vehicle Owners' Right to Repair Act

Automakers lock independent repair businesses out of timely repair information to work on vehicles, locking consumers out of the ownership of their own cars. They claim that all the information is available.

It's time to set the record straight!

High Beams is published on a regular basis to shine the light on the truth and spotlight information car companies want to keep in the dark.

One Automotive Aftermarket Association Opposes HR2048 Out of Dozens! **But, what do their own members say????**

Representatives of The Automotive Service Association testified before Congressional Committees that the Motor Vehicle Owners' Right to Repair Act is vital. Now, they do not support the bill. Why?

We think we know. But, we DO know that rank and file ASA members DO support this bill.

In a survey just completed jointly by The Tarrance Group and Lake Research Partners, ASA members overwhelmingly supported HR 2048.

Here is a direct quote from the pollsters:

“There is overwhelming support among Independent Automotive Aftermarket Shop owners and managers for the Right to Repair Act. Fully 88% of respondents favor passage of this legislation, including 65% who “strongly” favor its passage. This overwhelming level of support is consistent among ... Automotive Service Association members (87%)....”

This is consistent with a survey taken in 2004.

HR 2048 IS needed.....NOW!!!!
